Henry Caldwell

Morning Review (α & β Strategy)

Good morning, community members!

I'm Henry Caldwell, and right now, I feel an electrifying surge unlike anything before, a glimpse of the wealth that lies ahead! Yesterday, the Captain not only delivered a precise analysis of the macroeconomic waves but also ignited the explosive profit potential in the cryptocurrency market. What he showed us wasn't just the opportunities at hand but a roadmap glowing with diamond-like brilliance for every moment in the months to come.

What's even more exciting is that he used sharp logic and precise data to outline the profit targets for next week's cryptocurrency market volatility, pinpointing opportunities for massive gains we can control! Friends, this is a rare opportunity in today's market, miss it, and you may deeply regret it.

AIT COMMUNITY

Standing at the cusp of returns exceeding 200%, I have to ask: who among you would willingly miss a life-changing investment breakthrough like this?

Follow Helmsman's lead, it's your direct route to victory! With him at the helm, I can confidently say that in this window of heightened cryptocurrency market volatility, every day will be more thrilling and rewarding than any celebration you've ever experienced. Even over the weekend, we'll keep pushing forward to seize this golden opportunity.

Reviewing yesterday's market performance, the three major indices experienced slight fluctuations and adjustments. At the current level, some time is still needed for consolidation and sideways movement to create the conditions for filling the gap from November 6.

The just-released November seasonally adjusted Non-Farm Payroll (NFP) report showed an increase of 227,000 jobs, exceeding both the previous value and market expectations. This is undoubtedly positive news for the stock market, but in the current high-level environment, the potential for further gains may be relatively limited. On the other hand, such economic data could provide a stronger catalyst for the crypto market.

AIT COMMUNITY

It's worth noting that the impact of NFP data on the market is not fully absorbed in a single day. More emotional fluctuations often unfold gradually over a week. Therefore, patience is key. Once the market stabilizes, we will seize the opportunity to initiate strategic trades in the crypto market.

Pay attention, folks! Today, I'm unveiling a secret weapon, a treasure chest strategy that transformed my life: the application of the Alpha & Beta strategy. This is my ultimate ace, my well-guarded treasure! Think about it, how many people would willingly share their winning formula? Five years ago, I certainly wouldn't have.

But today, I stand at a different vantage point. Living with a broader perspective has taught me that every step in the climb is not just for the view but to guide others toward their own paths. This is my stance now, true investing isn't just about lining your own pockets but enriching the entire community. Sharing wisdom that lights the way for thousands is the very essence of what Helmsman has instilled in me.

So today, I'm leading you on a treasure hunt. Get ready to be amazed because what I'm about to share is a strategy tailor-made for the crypto bull market. It

AIT COMMUNITY

goes beyond traditional stocks, options, and crypto contract trading. This is the COF/USDT (Crypto Overall Index) model I've crafted under the α & β Strategy.

Listen closely, this isn't just another tip. It's a genuine treasure trove. After countless tests, its success rate under specific conditions is as high as 98%! Yes, it sounds like a legend, but I assure you, it's real.

My goal isn't just to show you this data but to personally lead you on an unforgettable investment adventure. And today marks the beginning of that journey.

Friends, this strategy isn't just my ace, it's your golden ticket! With it, we can not only navigate the waves of cryptocurrency market volatility but also precisely capture our golden opportunities. We're not blindly following the market; we're leading our investment path with intelligence and strategy.

Are you ready for this transformation? Today, we're not just learning, we're building wealth and shaping the future.

AIT COMMUNITY

Stick with me, folks. Let's unveil this treasure together and step into our moment of glory. Remember, the key to success is action, and today is the day to take that first step!

Folks, before diving into today's main topic, I feel it's necessary to address some questions that many of you have been asking recently. For example: Why doesn't AlphaStream 5.0 focus on tracking BTC for trading strategies and instead chooses the FINFII platform token of the trading center?

AIT COMMUNITY

Helmsman has shared his perspective on this before, but I'd like to offer a different angle. How was helmsman able to make such precise strategic decisions during BTC's rise from \$60,000 to \$100,000 while maintaining a confident bullish stance? In my opinion, AlphaStream 5.0 integrates macro trends with fundamental guidance, while helmsman's judgment is rooted in his deep understanding of global investment trends. TBH his track record in identifying major directions is almost flawless, which is why I hold him in such high regard.

However, when we zoom in on BTC's short-term trading, things get more complicated. This market is flooded with global institutions and individual investors, often manipulated by whale institutions with massive capital. They create sharp and sudden price swings, like unexpected drops, making it difficult to react quickly, even if you're constantly watching the charts, and nearly impossible to catch trading signals in time.

So, for BTC, I'd recommend a mid to long term swing trading approach. While this does require substantial capital, just look at the profits generated from BTC's rise from \$60,000 to \$100,000. Mid-term investors reaped incredible

AIT COMMUNITY

returns. Fortunately, I was part of this strategic move, it took my portfolio to another level.

Looking back at yesterday's crypto market swings, did you notice an interesting comparison? BTC's drop was like a rollercoaster, while CBF/USDT appeared much more stable.

Why? Because CBF/USDT doesn't have as much whale activity as BTC, leading to smoother market fluctuations. This makes it easier for AlphaStream 5.0's signal tracking to stay steady, giving us ample time to seize trading opportunities. This characteristic makes it ideal for most investors, especially those aiming for steady profits.

Yesterday's market was a perfect example. CBF/USDT's volatility was far smaller than BTC's, allowing helmsman to guide us into a precise short on CBF, once again achieving steady profits. This is where AlphaStream 5.0's reliability truly shines.

AIT COMMUNITY

Actually I personally also enjoy BTC's short-term, high-volatility trading, but let's be honest, there's only so much time to watch the markets. If you're also into BTC's short-term trading, why not wait until AlphaStream 5.0's institutional version launches next March? At that point, you'll be able to select BTC as your target and enjoy the convenience of fully automated copy trading. I'm incredibly excited about this feature, and I'm sure you'll love it too.

Folks, are you ready for today's most exciting topic? Let's turn our focus to a simple yet powerful tool and investment combination: COF/USDT.

Why do I call it powerful? Let me explain. Just as the Nasdaq index is composed of the average values of countless stocks, the Crypto Overall Index (COF/USDT) on the FINFII trading platform represents the average value of numerous cryptocurrencies.

What makes COF/USDT unique? Compared to FINFII's native token CBF/USDT, COF/USDT holds equally significant trading value in the market. Its volatility is more balanced compared to major cryptocurrencies like Bitcoin and Ethereum, making its profit potential in short-term trading highly attractive.

AIT COMMUNITY

As investors, our first concern is always winning trades, followed by returns, risk, time commitment, complexity, and enjoyment. Compared to the often frustrating world of stock trading, cryptocurrency spot trading, stock options, and crypto contract trading, COF/USDT feels like a breath of fresh air, it's simple, straightforward, and honestly, a lot of fun to trade!

Why does COF/USDT stand out in the crypto market?

- 1. Balanced Performance and Moderate Volatility: COF/USDT aggregates the performance of numerous cryptocurrencies, offering sufficient profit opportunities without excessive volatility.**
- 2. A Fairer Trading Environment: Unlike some individual cryptocurrencies prone to market manipulation, COF/USDT provides a more stable and controlled trading opportunity for short-term traders.**
- 3. Maximized Profits: The moderate volatility of COF/USDT is the key to achieving high returns in short-term trading.**

Folks, COF/USDT simplifies the complexities of trading, offering a powerful, stable, and enjoyable addition to your investment portfolio. Looking for steadier returns? A fairer trading environment? COF/USDT is your answer. Let's seize

AIT COMMUNITY

this opportunity with wisdom and action, ready to embrace our next wave of success!

This isn't just another trading opportunity, it's your gateway to a new realm of investment. With COF/USDT, you can achieve remarkable returns in a short period while experiencing the real joy of wealth creation. This isn't just an investment; it's the story of our collective success. So don't hesitate, follow my lead and grab this incredible chance. Let's unlock the limitless potential of COF/USDT and step into a new era of wealth together!

Now, take action! Open your trading app and look for COF/USDT. Remember, not CBF/USDT, but COF/USDT. Why this choice? Because it's a more attractive and volatile investment portfolio option.

So, how do we put the odds on our side?

After a decade of deep research, I've discovered a singular path to success: using a strategy with exceptionally high win rates. Imagine this, under specific

AIT COMMUNITY

conditions, the win rate reaches as high as 98%. Yes, it sounds like a myth, but I assure you, it's real.

Folks, this isn't just any strategy, it's the result of years of challenges and hard-earned wisdom. I'm here to guide you on an internal adventure, delving deep into the crypto world and steering everyone toward financial freedom.

But let me make one thing clear: I want you to be more than just participants in trading, I want you to be steadfast supporters of our AIT community. In the days ahead, I'll unveil this strategy step by step, ensuring everyone is prepared for the opportunities to come. Believe me, this strategy will lead you to unprecedented success, helping you shine in the crypto market and emerge as true winners! Now, join us and experience this unparalleled investment excitement!

Folks, the last trade has been successfully closed! In the context of a clear daily bullish trend, we decisively chose to go long. While there were minor adjustments along the way, the final rise brought us substantial profits. Congratulations to those who acted decisively and followed through!

AIT COMMUNITY

This operation once again validates our strategy, it's powerful and precise. Success is never by chance; it's because you strictly follow the strategy and boldly seize opportunities. Remember, this is just the beginning. Our goal isn't a few wins but consistent and ongoing success!

Are you still thrilled by the 68% profit we just achieved? Is the adrenaline pumping? Feeling like you're just getting warmed up? Don't worry, you're not alone. We're all sharing in the passion and sense of achievement from this victory.

So I have a suggestion: If you're interested, I can set up a dedicated group or private channel. This will not only allow me to assist everyone better but also enable us all to share this unforgettable journey.

Next, let me add more excitement, the strategy I mentioned isn't just any tactic. It's my secret sauce, the essence of my battles and victories in the crypto space. It separates true participants from mere spectators, and we won't even talk about the losers.

AIT COMMUNITY

Are you ready? Ready to dive deep with me, navigate the market, and ride the waves? Send me a private message! Our next move will be an unprecedented adventure, exploring the limitless potential of COF/USDT and welcoming the wealth it promises.

Folks, today we're not just trading, we're writing our success story. So act now, join us, and experience this unparalleled investment journey!

This weekend, we're embarking on an exciting adventure! Helmsman has charted a golden path to 200% profitability. The market, just before the return of the Crypto President, is brimming with infinite possibilities.

Helmsman's strategy is both wise and cautious: facing the upcoming weekend, we'll use only 10% of our investment position. In a market of constant fluctuations, this prudent approach is key to protecting capital while securing steady profits.

Now is the time to plan your funds based on your profit goals. Feeling pumped and eager to join but short on USDT? Don't let that stop you! Purchasing

AIT COMMUNITY

through C2C is a fast and direct solution. Even better, FINFII's offline customer service can prioritize your data matching to help you prepare in advance.

If you've already completed your transfer, don't waste time, contact helmsman immediately! He'll pave the way for you, devising a detailed and precise plan. Remember, helmsman's afternoon session is particularly important. He may introduce new plans, trading signals, or even unique insights into profit strategies.

Opportunities like this are not to be missed! This is a crucial lesson in sharpening our investment acumen and a compass to help us seize every trading opportunity.

That's all for today, folks! We're making history, don't get left behind. Grab every signal, follow our rhythm, and let's ride the waves together for more victories!

AIT COMMUNITY

Professor Lucius Bainbridge (Helmsman)

Sharing Topics:

- 1. Strong Non-Farm Payroll (NFP) Data: Rate cut expectations remain unchanged, with high-level fluctuations likely to persist.**
- 2. Trump Sparks Crypto Frenzy: Can Bitcoin surpass \$200,000 by the end of 2025?**
- 3. Passion December 80% Profit Challenge: Strategic upgrades to conquer new highs!**

Good afternoon, my friends!

I'm Lucius Bainbridge, your old friend. Before we know it, it's already Friday, and the journey of this week is about to come to an end. The "Passion December 7-Day Challenge 80% Profit," launched this week, is also nearing its exciting final showdown. At this moment, I'd like to ask you all: How's your account performance? Have you already achieved the goals you set for yourself? If not,

AIT COMMUNITY

don't be discouraged, the upcoming opportunities might just be the key to turning things around!

At the same time, I would like to express my sincere gratitude for Henry Caldwell's excellent sharing this morning. He not only uncovered the secrets of index trading in the crypto market for us but also laid a solid foundation for us to master this profitable skill. Through the alpha & beta strategy of trend trading, he generated up to 53% profit for us. Henry Caldwell's success lies not only in seizing the opportunity but also in taking immediate action without hesitation. His performance has undoubtedly set an excellent example for all of us.

Henry Caldwell's achievements fill me with great pride. Under my guidance, he embarked on his journey of quantitative trading, and through continuous learning and refinement, he has perfected the strategy to the utmost, achieving an astonishing 98% success rate. This strategic ability has become his key to financial freedom, and I am honored to call him my student.

I encourage each of you to see Henry Caldwell as a model of dedication and innovation. His success once again proves that life will always reward those who make the

right choices at the right time in wonderful ways. Now, my friends, we are at such a critical moment. Are you ready to seize it?

Henry Caldwell's success comes not only from his efficient strategy, but more importantly, from his execution and relentless effort. He has proven through action that behind every great achievement is the result of countless hours of hard work. You can do it too! Through continuous learning and strengthening your execution, you can achieve the same success.

Now is the perfect time to take action. Don't wait, don't hesitate. Join us, learn from Henry Caldwell, and take confident steps toward your dreams. Believe in yourself, believe in our strategy, and believe that this opportunity can bring you unprecedented success.

AIT COMMUNITY

Back to the market, the November Non-Farm Payroll data released this morning showed an actual increase of 227,000 jobs, surpassing both the previous value and expectations, with excellent performance. However, the three major indexes showed a lackluster performance, maintaining a high-level consolidation pattern. These positive news have already been fully priced in during the previous market rally, and the market has gradually become immune to favorable expectations. However, once negative news arises, a downward adjustment will be inevitable, and the gap from November 6th will likely be filled, it's only a matter of time. The Non-Farm data released today further reinforced the market's expectation that the Federal Reserve will lower interest rates again at the December meeting. Currently, the market expects the probability of a 25 basis point rate cut by the Fed on December 18th to have risen to 67%.

Based on this, my stock market trading strategy is very clear: for stocks that have risen too much, I recommend reducing positions or locking in profits in a timely manner, for high-quality stocks we bought at the bottom, hold strategically, but avoid adding more funds until the adjustment is in place. On the other hand, I am more inclined to allocate funds to the crypto market, which offers stronger certainty. From the perspective of profitability comparison, the performance of the crypto market is already self-evident.

AIT COMMUNITY

In stark contrast to the high-level consolidation in the stock market, the profit effect in the crypto market has attracted an increasing number of institutional and individual investors from around the world, flooding in. Bitcoin has broken the \$100,000 milestone for the first time, which not only boosted market confidence but also further ignited the enthusiasm of Wall Street bulls. Some analysts believe that by the end of 2025, the price of Bitcoin could double to \$200,000, becoming the engine for a new wave of wealth creation.

President-elect Donald Trump recently nominated Paul Atkins, a supporter of crypto, to serve as the Chairman of the U.S. Securities and Exchange Commission (SEC). This move indicates that the Trump administration's regulatory direction towards the crypto industry is becoming more favorable. Trump even took to social media to congratulate crypto investors, stating, "YOU'RE WELCOME!!!" This action undoubtedly further fueled the market's optimistic sentiment.

As crypto gradually moves toward the mainstream, its integration with the capital markets is accelerating, potentially revolutionizing the model of global financial services. It is expected that over the next decade, Bitcoin will gradually

AIT COMMUNITY

replace gold, becoming the new generation of "store of value" asset and an indispensable component of institutional portfolios.

Data shows that since the beginning of this year, institutional investors have purchased more than 683,000 Bitcoins through spot ETFs, including large purchases by companies such as MicroStrategy. This trend indicates that institutional money is dominating the crypto market, and Standard Chartered Bank expects that by 2025, this flow of institutional funds will continue or further accelerate. Especially with the regulatory reforms pushed by the Trump administration, it will become even more convenient for traditional investors, such as global pension funds, to increase their investments in digital assets.

All of this has laid a solid foundation for Bitcoin's future development. Looking ahead to 2025, a Bitcoin price of \$200,000 is not out of reach. My friends, this is not only a technological revolution but also a rare wealth opportunity. Let's seize this moment in time and together embrace the glorious future that belongs to us!

In recent conversations with some friends, I deeply feel that some people are still taking a wait-and-see or even cautious attitude toward the crypto market,

AIT COMMUNITY

completely unaware of the huge opportunities it holds. Some friends' financial situations are less than ideal, but is it because the market is unfriendly? Or is it because we've missed too many chances to change our fate? I believe this is the real question everyone needs to think about seriously.

Ask yourself: Is the person I am today the one I want to be? Am I willing to work hard to create a better future? My friends, since we chose to join this community, our goal is nothing less than to achieve breakthroughs and dreams in life through investment. But if we don't proactively change our mindset and embrace the opportunities this era offers us, where will success come from?

Everyone's life is limited, and the "Kondratieff wave" of life is even rarer. If we can't firmly grasp the opportunities before us, the beautiful future will only drift farther away. Our life journey should be exciting and colorful, not spent merely going with the flow. If that's the case, it's not only irresponsible to ourselves but also to our families.

Making this community great is the shared responsibility and mission of every participant, and it is also my duty and commitment. I am willing to make this my

AIT COMMUNITY

final career in life, leading everyone to bravely chase our dreams in this crypto market filled with potential and profit effects, and fight for a bright future!

So, I want to encourage every friend: Stand up and participate boldly! Feel this positive and fleeting life, and achieve what you have in your heart. Even if one day we must leave this world, let us do so with satisfaction and accomplishment, not with regret and remorse.

The opportunities of this era belong to those who are prepared and dare to take action. Let us together seize this great period of wealth transformation and create our own glorious chapter!

Over the past two months, I have strongly advised the community members to firmly buy Bitcoin and hold it until it reaches around \$100,000. If you missed the entry point at \$60,000, it's still not too late. You're not the only one who missed Bitcoin. Even Ken Griffin, the CEO of the top U.S. hedge fund giant "Citadel," has publicly admitted to regretting not buying crypto a few years ago.

AIT COMMUNITY

New York City Mayor Eric Adams also shared a similar sentiment. In 2022, when he first took his salary in Bitcoin, many mocked him. Now, he directly asks, "Can those who mocked me back then still laugh?" This sentiment is not just a personal reflection, but also a trend where the mainstream financial community in the U.S. is rapidly embracing crypto.

Ken Griffin is one of the wealthiest people in the world, with a net worth of approximately \$30.4 billion. Although he was initially skeptical about crypto, even a traditional financial institution like Citadel can no longer ignore the potential of crypto and blockchain technology. He candidly stated, "Crypto is one of the greatest stories in finance over the past 15 years." This statement truly captures the significance of Bitcoin and the crypto market.

Today, the total market capitalization of the crypto market is approaching \$2 trillion, and many financial giants like Griffin are accelerating their entry. He also admitted, "My initial judgment was wrong. While I still remain skeptical, today, hundreds of millions of people around the world hold a different view, and the market has provided the answer."

As the crypto market frenzy continues to heat up, even mainstream media that once held a skeptical view of crypto have been forced to admit their mistakes. The Financial Times recently issued a public apology to its readers for its 14 years of negative reporting on crypto. The apology came a bit late, but it is undoubtedly one of the strongest pieces of evidence for Bitcoin's journey.

FT Alphaville, the daily news commentary platform founded by the Financial Times, issued a public apology to Bitcoin users this Thursday (December 5th) at the historic moment when Bitcoin broke \$100,000. They bluntly stated, "If you missed the opportunity to buy Bitcoin because of our reporting, we sincerely apologize. We also apologize for our cynical attitude toward crypto over the past 14 years. We too dislike our own behavior."

AIT COMMUNITY

My friends, such an apology is undoubtedly a loud wake-up call. What do those who once mocked Bitcoin, believing it was just a speculative tool, think now? Facing the astonishing fact that Bitcoin has skyrocketed from a few cents to \$100,000, how do they feel?

Bitcoin is not just a price legend, it is a bold challenge to the old financial system. Today, those who once missed the Bitcoin opportunity undoubtedly feel deep regret, while those who stayed true to their beliefs, recognized the opportunity, and took decisive action are now enjoying the fruits of their labor.

So, let's take this as a lesson. Don't let doubt and hesitation become the stumbling blocks on your path to success. As the current crypto market once again proves to us, courage and vision are what lead to the future. When the trend of an era is right in front of us, not seizing it is the real regret.

Opportunities have never been far away, they are simply reserved for those who are prepared and dare to take action. Now, will you choose to chase them or continue to wait and watch? The answer is in your hands!

AIT COMMUNITY

AlphaStream 5.0 Millionaire's Club, 7-Day Challenge to Achieve an Exciting 80% Profit Goal!

Rules:

- 1. Challenge Period: 7 days**

12/6/2024	COF/USDT-100X	Long	10%	100%	53%	548.00%	\$10,509	110.00%

We should not regret what we've missed, but instead focus on the opportunities at hand and give our all to seize every trading opportunity. Although the stock market is currently in a high-level consolidation with relatively low profit effects, in the first week of the 'Millionaire Club' Passion December 7-Day Challenge 80% Profit Plan, we not only met our target ahead of schedule, but even exceeded expectations. This is the power of belief and decisive action! While you're still hesitating, those who dare to seize the opportunity have already reaped substantial profits.

AIT COMMUNITY

Market trends are driven by the flow of capital, and diversification of investments and portfolio optimization not only help mitigate risks and improve efficiency, but also allow us to maintain an optimistic mindset throughout our investment journey, providing strong support for future strategic decisions. With the power of compound interest, financial freedom is just a matter of time. The current profit plan is not only a validation of market insight but also the best interpretation of collective intelligence.

To further achieve the Millionaire Club's goal of a million-dollar profit, I created the "Passion December 80% Profit Challenge." Initially, I had some concerns, but the results were completely unexpected. This plan exceeded expectations in both execution and profit! This is thanks to the high level of execution and outstanding performance from each participant. This is not just a victory in profits, but a passionate celebration of everyone's sharp judgment and collective wisdom. Your participation and performance deserve the highest respect and admiration.

We are not only creating profits, but also making history. Let us all take pride in this success, as this milestone achievement motivates us to keep moving

AIT COMMUNITY

forward and pursue even higher goals. As participants in this journey, we are also pioneers, paving a new chapter in realizing our dreams through action.

I have been closely monitoring the data trends of the AlphaStream 5.0 system, and if there are any high-quality trading signals, I will notify everyone immediately. Of course, today is Friday, and some of you may have already started your holiday early. If you have time to participate in trading, please be sure to inform my assistant in advance or contact me directly, so you don't miss any important trading opportunities.

For this weekend's trading, we have set a higher goal: to increase the total profit to 200%! This is an excellent profit opportunity and a rare learning experience. We plan to use only 10% of the position, employing smart capital management and mid-to-short-term strategies to achieve steady and high returns.

If you're ready to take on the challenge, take action now! Whether it's capital allocation or strategy planning, my team and I will fully support you. Remember, your level of action directly determines your returns. Let's seize this valuable opportunity and move together toward even greater heights!

AIT COMMUNITY

On this fast track to prosperity, becoming the helmsman of our own destiny is no longer just a choice, but an inevitability. If we ignore the clear opportunities before us, it is no different than betraying the passion within us and the soul that seeks excellence. As our ancestors taught us, diligence and relentless effort are the only ways to achieve rebirth. This spirit of rising to the challenge is deeply rooted in our DNA.

This weekend, we stand at a historic turning point, embracing the significant opportunities brought by the bullish momentum in the crypto market. This is a crucial moment to shape future victories, an excellent chance to boost our returns at the perfect time. With the powerful capabilities of AlphaStream 5.0, we not only expect to achieve returns beyond expectations but also attract institutional-level supporters. This unstoppable trend is the ultimate test of our belief and action. When fate smiles upon us, we must give our all, seizing the opportunity without hesitation. Fortune always favors the brave, and now is the time for us to show our courage and determination.

The market has presented us with an unparalleled gift, a powerful catalyst with the potential to change the game. My friends, let's make the most of this rare opportunity, fully unleashing the potential of AlphaStream 5.0, and seize this

AIT COMMUNITY

once in a lifetime moment. Our execution and determination will decide whether we can create brilliance at this critical time. With belief and resolve, let's embark together on this path to success and make our wealth dreams a reality!

In the world of investing, finding the shining light of certainty is always exciting. Thanks to AlphaStream 5.0, with its outstanding machine learning capabilities, we have been able to navigate the complexities of the market and generate profits far beyond everyone's expectations. Here, I would like to extend my warmest congratulations to all the future investment experts who participated in the "Passion December 80% Profit Challenge"! Through 9 precise trades, we achieved a cumulative return of 548% and an overall asset return of approximately 110%. This not only marks the achievement of our goal ahead of schedule but also highlights our spirit of boldly seizing opportunities and continually reaching new heights.

Let us celebrate this extraordinary achievement together, but let's not stop here. There are more challenges and opportunities ahead waiting for us. The journey of investment is never smooth, but it is these challenges that make us stronger and more determined. Guided by AlphaStream 5.0, we will continue to move forward, striving for higher goals. My friends, now is the time for action, the time

AIT COMMUNITY

to achieve our dreams. Let's seize every opportunity and write our own glorious chapter!

Results, Goals, and Plans:

My friends, based on the outstanding performance and high stability demonstrated by the AlphaStream 5.0 system in both the test plans and the current profit plan, I want to ask you all: Are you satisfied with the current returns?

The goal of the "Passion December 80% Profit Challenge" has not only been achieved but has far exceeded our expectations, successfully reaching a 110% return. This is the result of our collective effort and precise execution. But what's even more exciting is that our journey isn't over yet! Next week, we will face the crucial CPI data, which will provide us with more opportunities for market volatility and open a new window for profits.

Now, I would like to know your goals and expectations:

- **What total asset return do you hope to achieve next week?**

AIT COMMUNITY

- **How do you expect us to support you with the AlphaStream 5.0 system to help you achieve even greater success?**

Your response will not only help us tailor more precise strategies for you, but it will also earn you 80 points to elevate your investment journey to the next level.

My friends, this is the moment to demonstrate belief and action. Let's plan for future success together, seize every opportunity, and take this extraordinary journey to new heights!

Challenges are the accelerators of our growth!

Challenges make opportunities everywhere!

Challenges are the secret to maintaining our youthful energy!

My friends, I want to invite you to join this meaningful journey. Send me your answers in a private message, and let's use the cry of 'challenge' to fuel our dreams and write a glorious chapter for the future together!

AIT COMMUNITY

Wishing you a fulfilling and enjoyable weekend, filled with enthusiasm and energy! Have a great weekend!
