**Henry Caldwell**

**Morning Review ( $\alpha$  &  $\beta$  Strategy)**

**Good morning, community members!**

**I'm Henry Caldwell, and with the wonderful Christmas holiday behind us, it's time to return to the battlefield and embark on a new journey. As Helmsman often says: "Let money never sleep." As long as you're in the market, whether for learning or profit, if the trading hours are active, you must not miss great opportunities. Only through consistent participation can you truly experience the opportunities and rewards the market has to offer.**

**In my heart, Helmsman is a true master of investment philosophy. His precise grasp of market sentiment and profound understanding of trend trading command genuine admiration. However, what moves me the most is not his wealth or achievements but his unreserved sharing with us. Isn't such selfless**

**AIT COMMUNITY**

**dedication a form of greatness? If you encounter someone like this in your life, willing to selflessly share their investment experience, you must treat them sincerely and cherish such a friend!**

**To be honest, I didn't fully grasp this at first. Before joining AIT community, I was like many others, easily caught up in the frustrations of short-term gains and losses. If I incurred a loss, I would blame the recommender, if I made a profit, I would take it for granted. But under the Helmsman's guidance, I not only learned how to analyze the market and develop strategies but also realized that investing is not just a battle of skills, it's a discipline of mindset.**

**Helmsman's sharing is not just about experience but also guidance and strength. He helps us understand that investing is not merely about pursuing wealth but about discovering deeper meaning and direction. It is this selfless spirit that fills me with profound gratitude and admiration.**

**Folks, the road of investing is full of challenges, but it's also brimming with endless possibilities. If you're fortunate enough to meet someone like Helmsman, someone willing to illuminate your investment journey with his**

**AIT COMMUNITY**

**wisdom and experience, be sure to cherish it. Such a friend and mentor is the most valuable asset in your investment career.**

**Seize every opportunity to learn and grow. No matter what stage you're at right now, as long as you stay sincere and put in the effort, your future will undoubtedly be full of possibilities. Let's keep moving forward and write our own legend in this extraordinary market!**

**I have to say, Helmsman's passionate rallying cry on Tuesday morning completely ignited my investment dreams. Every word he spoke felt like a call to each and every one of us: Take action! Bring your full strength and prepare for the showdown with the Non-Farm Payroll data at the start of next month! Folks, did you feel it? That sincerity, that power, it's absolutely impossible to ignore!**

**In this moment, my heart is racing with excitement. I'd bet you feel the same, deeply moved by the passion that has been lit from within. Being part of this journey, I feel an unprecedented sense of mission. For sharing, for growth, and for achieving the goals we hold in our hearts together, we cannot afford to miss this. This is our chance, our moment to create greatness!**

**AIT COMMUNITY**

**A 600% profit opportunity is right in front of us, the battle for Non-Farm Payroll is about to begin. Folks, this is not a time to wait and watch, it's the time to give it everything we've got and sprint toward the opportunity. What we must do is not just participate but fully commit and seize this once in a lifetime chance with all we have.**

**Every great battle requires unwavering determination and swift action. Now is the time for us to write our legend. Let us embark on this thrilling journey together and embrace the arrival of the Non-Farm Payroll battle!**

**The latest data for initial jobless claims for the week ending December 31 came in at 219,000, below both the previous value and the forecast. This data sends a clear signal to the market: the job market remains robust, with strong labor demand continuing.**

**So, what does this mean for the stock market? Strong employment data, while demonstrating economic resilience, could also reinforce the Federal Reserve's resolve to maintain its current monetary policy. In the short term, this presents a clear "sentiment test" for the stock market. Why? Because the market had been anticipating more accommodative policies to drive a bull market, but this**

AIT COMMUNITY

data might instead lead investors to worry that the Fed's rate cutting pace could slow.

Taking the Dow Jones Industrial Average (DJIA) as an example, we can clearly observe that after filling the gap from November 6 on the daily candlestick chart, the index has entered a state of choppy recovery. However, it's worth noting that the 250-day moving average (250MA) below has not been touched for nearly a year. If we extend the timeframe to three years, this situation appears highly unusual. This suggests that in the coming period, the Dow is likely to oscillate

**AIT COMMUNITY**

and test the 250MA, potentially developing a wave pattern around this critical moving average.

Considering the current backdrop of policy stimulus, it's evident that the momentum driving U.S. equities upward has significantly weakened. What's propping up the market now is more of a tug of war among a few high quality mega cap stocks, rather than a synchronized rally across sectors. More critically, the absence of institutional capital makes the market's buying power appear thin and fragile. How long can this structural situation persist?

We know that the core driver of the market is always the flow of capital. Without robust institutional support, even short-term rebounds in the market are unlikely to translate into sustained upward trends. For investors, this is a pivotal moment for cautious observation and strategy adjustment. Folks, remember, finding the next wave opportunity during calm market conditions is the true essence of investment wisdom.

Take Tesla as an example, folks, do you remember? I previously shared this stock with everyone, highlighting that when it broke out of the left-side consolidation zone, it was an excellent buying signal. From the low of \$182 on May 8 to the high of \$488.54, the increase was nearly 168%. This rally was truly remarkable, but at its current price level, it has clearly lost its appeal as a buy.

Looking back at Tesla's upward journey, we can draw some important insights. Did you notice how Tesla's news always dominates major media headlines? Musk's actions repeatedly become market hotspots. This high-frequency news

**AIT COMMUNITY**

**exposure often fuels the stock's price movement. As an investor, were you part of it? If you seized this opportunity without leverage, your returns would have been at most around 160%. And if you missed it, there's no need to feel regret.**

**Why? Because the opportunities in the upcoming crypto market will far exceed your expectations! Bitcoin's profitability has already proven this point. When Helmsman strongly recommended buying at \$60,000, he clearly stated the target was \$100,000. And what happened? In less than two months, this target was effortlessly achieved. This is the power of a certainty driven opportunity!**

**As a seasoned investor, we need to understand the art of choice. The market is always full of countless voices and temptations, but we should focus on capturing those truly certain, high-conviction opportunities, rather than being misled by superficial survivor bias. For instance, debating whether Tesla is worth chasing at this point has completely lost its meaning. If you wanted to buy, you should have done so earlier; at these highs, chasing will only add unnecessary risk.**

**The positive momentum in the crypto market is something we've all felt deeply. With the "Crypto President" about to return, America's vision of becoming the**

**AIT COMMUNITY**

**“Crypto Capital” is becoming clearer, no longer just a dream, but a reality in the making. Numerous countries worldwide have already incorporated Bitcoin into their strategic reserves, while the Magnificent Seven in U.S. equities have taken the lead by adding Bitcoin to their balance sheets. These moves make it abundantly clear that the U.S. is not just a leader but the central force driving the global crypto revolution.**

**Folks, this is the most certain opportunity of 2025, there’s no comparison. Amid the wave of this emerging market, the U.S. is leading the world into a new era of crypto. Missing this opportunity could mean missing the best chance for an average investor to change their destiny.**

**As Helmsman says, how many Kondratiev waves does a person encounter in a lifetime? Maybe just one, but if you can seize this one, it’s enough. Don’t hesitate any longer. The opportunity is right in front of you, waiting for you to make your move. Take action now, join this crypto revolution, and seize the golden opportunity this era has gifted us!**

**Folks, this is the wisdom of investing: knowing when to let go of small opportunities and fully embrace high certainty, major opportunities. The**

**AIT COMMUNITY**

**upcoming crypto market is not just an opportunity, it's the epicenter of a wealth reshaping storm. Take action now, and use Helmsman's strategies to seize the next golden opportunity!**

**Recently, a friend asked me, "Why does trading with AlphaStream 5.0 seem so effortless when it comes to making profits?" The truth is, it's not by chance, it's the nature of market rules. In financial markets, profit and loss are always a zero-sum game. Think back to the last surge in Tesla's stock price, how many shorts were wiped out, becoming the foundation for the longs' profits? The same applies to the crypto market. When you go long, your counterparty on the other end is going short. This is the market: every dollar you earn is a loss for your counterparty.**

**This oppositional nature reveals a kind of relativistic logic. When Helmsman advised everyone to boldly position at \$60,000 Bitcoin with a target of \$100,000, others were shorting at the same level, convinced that Bitcoin would fall back to \$30,000. The shorts believed Bitcoin wasn't worth that price. And the result? The market's ultimate direction proved everything. Who was right and who was wrong only became clear as the trend unfolded.**

**AIT COMMUNITY**

**The true power of AlphaStream 5.0 lies here. It helps us precisely capture market trends, avoid the losing side, and stand with the winners. Folks, the market doesn't favor anyone, it only rewards those who follow the rules and see the trends clearly. With AlphaStream 5.0, we not only understand the logic of the market but also gain the advantage. This is the real secret to effortless profits!**

**Seizing an opportunity is like chasing a feather in the wind, every moment of delay could make you miss out on the grandest feast. Imagine compound interest as a fruit tree you've planted with your own hands. Missing one day of planting doesn't just cost you that day, it costs you the most abundant harvest when the tree is laden with fruit in the future.**

**Imagine you have an initial capital of \$1 million, with a goal of reaching \$5 million. On the first day, your gain might be \$200,000; by the second day, it could grow to \$500,000. And when you reach the final stage, your gain at that moment might be \$2 million! This is the power of compounding and time, the true loss lies in missing out on the staggering wealth at the end of the growth curve.**

**AIT COMMUNITY**

**It's like picking up shells on the beach. At first, you may only find small shells, but as you keep moving forward, you'll discover larger treasures. And today, I must share an extraordinary opportunity with everyone: the upcoming Non-Farm Payroll (NFP) data release at the beginning of next month! This "superstorm" in the market will trigger massive volatility, it's the investment feast we've been dreaming of!**

**Folks, close your eyes and imagine, 600% to 700% profit potential from massive market volatility, an unprecedented investment feast! This is a life-changing opportunity, a pivotal moment that can help you break through, surpass yourself, and achieve financial freedom!**

**Now is not the time for hesitation, nor is it a moment for standing on the sidelines. Every second of delay could cause you to miss out on this victory destined for those who take action! From this moment forward, fully mobilize your funds and prepare for the Non-Farm Payroll battle at the beginning of next month! This fight is not just another market trend, it's a decisive opportunity that can completely transform our financial future.**

**AIT COMMUNITY**

**My funds are expected to be fully in place by next Thursday, all to seize this historic profit opportunity. If you, like me, have this level of initiative, then let me congratulate you in advance, 2025 might very well be the year you officially retire!**

**Folks, now is the best time to take action! Don't let yourself look back with regret, remembering how you missed such an epic opportunity. Take this bold step, join us, and embark on our journey to the pinnacle of wealth!**

**Folks, Helmsman has already paved the way for us, and the VIP Partner Group is the place you need to be! Here, you'll not only receive precise trading signals but also connect with like-minded partners. By joining, you'll gain access to the most advanced investment strategies and seize every potential profit opportunity under professional guidance.**

**Imagine the moment when the Non-Farm Payroll data is released at the beginning of next month, a market eruption like a volcanic explosion, with massive profits waiting right in front of you to seize! This is not just about numbers growing, it's a leap in your investment journey! This isn't empty talk, the opportunity is right here, and you must grab it. Impulse is necessary!**

**AIT COMMUNITY**

**Don't forget, before the NFP data is released, other critical data will inject volatility into the market. And as long as there's volatility, AlphaStream 5.0 can help us precisely lock in profits. Isn't this level of certainty an opportunity worth your full effort?**

**But there's one thing you must understand: this profit plan won't last forever! Once most participants achieve their profit goals, or the AlphaStream 5.0 subscription count reaches its target, the profit plan could be terminated at any moment. So now is the time to act! Join the VIP Partner Group immediately, prepare with full force, and seize this unprecedented investment opportunity!**

**Folks, this is your moment to change your investment destiny! Let's come together and create miracles in the Non-Farm Payroll market at the start of next month, writing a brilliant chapter of our own. Don't hesitate any longer, take action! Make your investment dreams a reality!**

**That's all from me today, folks! See you tomorrow!**

**AIT COMMUNITY**

**Eastern Time, December 26, 2024**

**3:30 PM**

**Professor Lucius Bainbridge (Helmsman)**

### **Closing Commentary**

**Good afternoon, my friends!**

**I'm Lucius Bainbridge, your old friend. With the end of the Christmas holiday, we are embarking on a brand-new investment journey. Speaking of holidays, I've always felt that the greatest sense of happiness in life often doesn't come from the moment a goal is achieved but from the sense of anticipation leading up to it.**

**Just like this Christmas holiday, the anticipation leading up to it was almost universally thrilling, that sense of happiness was invigorating. Doesn't every Friday bring a similar sense of longing for the weekend? This waiting and expectation often feel more beautiful and memorable than the actual start of the holiday or the moment when a goal is achieved.**

**AIT COMMUNITY**

**Now, let's channel this emotion into our investment journey. For those participating in the AlphaStream 5.0 Millionaire Club, why is your sense of happiness so strong? It's because you're standing on the peak right before reaching your goal, filled with a deep desire and anticipation for success. In the current crypto market, opportunities are clear and certain, it's like an open door, offering everyone willing to give their all the chance to change their destiny.**

**But friends, I must ask you: in the face of this rare opportunity, have you truly given it your all? Have you adjusted your mindset and allocated your funds to participate in the best possible state? Because we all know that the true source of happiness doesn't just come from anticipation, it comes from the process of actively pursuing our goals, from the sense of fulfillment and pride that follows wholehearted effort.**

**Let us face this investment feast with the strongest conviction and the most proactive actions, not just to achieve our goals, but to make our life journey more fulfilling and meaningful. Remember, every effort you make today is a stepping stone toward greater success. Now is the best time for you to act, don't let hesitation or complacency hinder your steps toward your dreams!**

**AIT COMMUNITY**

**A big thank you to Henry Caldwell for the excellent sharing session this morning! Henry Caldwell has once again proven through action that success is never accidental, it's the combination of decisiveness and foresight. In this emerging crypto market full of certainty, opportunities are equally available to every investor. The only variable is how much capital you're willing to commit, which directly determines the returns you'll reap. For seasoned investors like Henry Caldwell, who thoroughly understand the logic of investing, many participants are now fully preparing their funds for the major volatility event of the Non-Farm Payroll (NFP) data early next month. This is undoubtedly a life-changing opportunity.**

**In fact, before the NFP data at the beginning of next month, a series of critical economic data will be released, each triggering market volatility and providing us with even more quality profit opportunities. I completely agree with Henry Caldwell's key point: in today's market, we must focus all our efforts on the most certain opportunities. This is the wisdom of making choices, seizing the big opportunities while letting go of the insignificant ones.**

**AIT COMMUNITY**

**So, is there truly a right or wrong when it comes to choices? At this moment, we might not yet know the answer. It's like when we confidently bought Bitcoin at \$60,000, with a target of \$100,000, the correctness of our choice could only be proven when the target was achieved. And in the investment process, the only thing we can do is validate our choices through action. Just like earlier this year, when I strongly recommended AI and tech stocks and leveraged heavily into NVIDIA and Super Micro Computer (SMCI). The results have proven that these choices delivered significant returns.**

**And now, I am equally advocating for the crypto market, especially the precise opportunities captured through the AlphaStream 5.0 system. By March next year, I believe you will witness the extraordinary performance of AlphaStream 5.0 firsthand and see just how astonishing your account returns can be. This outcome may completely reshape your understanding of the market, and all of it stems from the choice you make today, the choice to believe and to take action.**

**Friends, investing has never been a game of luck, it's a game that requires wisdom and determination. The power of belief is immense, but the power of action is even more crucial. Let's prove through our actions that our choices are correct and transform today's conviction into tomorrow's brilliance. Remember,**

**AIT COMMUNITY**

**real opportunities are always fleeting, and only those who are prepared and act decisively can stand out and succeed.**

**Returning to the stock market, the holiday spirit of Christmas still lingers, and trading remains light. For the stock market, 2024 has been a relatively good year, but the road ahead may not be smooth. Recent analysis from Wells Fargo suggests that while post-election enthusiasm has driven the stock market higher, a “hangover effect” could emerge in the short term, with the S&P 500 potentially pulling back by as much as 7%.**

**According to Wells Fargo’s report released on December 24, the disconnect between the stock market and economic fundamentals is becoming increasingly apparent. While economic data remains moderate, post-election market sentiment has been elevated, fueling strong performance in the indices. However, the Bloomberg U.S. Economic Surprise Index is currently hovering around zero, indicating that economic data is largely in line with expectations, providing no significant positive surprises.**

**AIT COMMUNITY**

**This also raises caution that the stock market's optimistic expectations may have overly priced in a bright future while overlooking the current economic reality. This disconnect may eventually require a market correction to realign.**

**From a technical perspective, the S&P 500 index remains in a state of high-level consolidation, with the gap below yet to be fully closed. In the short term, the market is likely to remain choppy, but if a pullback occurs, the 200-day moving average at 5,590 points could serve as a critical support level, suggesting that the market might face a potential adjustment of nearly 7%.**

**At the same time, Wall Street is also cautioning investors about potential risks. BCA Research has warned that the current overvaluation of the S&P 500,**

**AIT COMMUNITY**

combined with expectations of slowing U.S. economic growth, could lead to a larger market correction early next year, possibly even entering bear market territory.

As Henry Caldwell shared this morning, although the three major indices have seen slight rebound recoveries after significant declines, the market may offer periodic rebound opportunities. However, truly seasoned investors must know how to make trade-offs. Letting go of short-lived, minor opportunities and focusing on capturing major investments with substantial returns is what defines a strategic investment mindset.

In the investment market, the hardest part is often not seizing opportunities but learning to let go. When we can approach decisions from a longer-term perspective and evaluate each choice with a broader vision, we transcend emotional short-term trading and move toward the path of mature investing. Remember, big opportunities require patience, and strategic trade-offs will be the key to achieving a leap in wealth!

According to Forbes, the crypto market in 2025 is set to witness seven disruptive predictions, each filled with exciting opportunities and challenges.

**AIT COMMUNITY**

**Let us focus on these trends together and think about how to find our own wealth code in this historic transformation:**

- **The New Era of Bitcoin as Sovereign Reserve:** Major economies within the G7 or BRICS nations may incorporate Bitcoin into their strategic reserves. This move marks a profound transformation in global sovereign wealth management, taking Bitcoin from digital gold to a global reserve asset—a historic step forward.
- **Explosive Growth in the Stablecoin Market:** With a clearer regulatory environment and rapidly growing global transaction demand, stablecoin supply is expected to double, surpassing \$400 billion. This will significantly enhance liquidity in cross-border payments and financial systems.
- **Boom in Bitcoin DeFi:** The application of second-layer networks will unlock Bitcoin's potential in decentralized finance (DeFi). Total value locked (TVL) is projected to exceed \$24 billion, expanding Bitcoin's role from a "store of value" to a "financial tool," creating unprecedented opportunities.

**AIT COMMUNITY**

- **ETF Explosive Growth:** Bitcoin and Ethereum ETFs will become even more widespread. At the same time, innovative crypto ETFs supporting staking and diversified indices will emerge, opening new investment avenues for traditional investors.
- **Tech Giants Embrace Bitcoin:** A leading global tech giant, such as Apple or Microsoft, is expected to include Bitcoin on its balance sheet under new fair value accounting rules. This will set a benchmark for other companies and accelerate mainstream adoption.
- **Breakthrough in Crypto Market Capitalization:** Driven by innovations in artificial intelligence (AI), DeFi, and decentralized applications (dApps), total market capitalization is projected to surpass \$8 trillion, achieving exponential growth in the depth and breadth of the crypto market.
- **Full Recovery of the U.S. Crypto Market:** With restrictive policies gradually loosening and a new SEC leadership taking charge, the U.S. will reclaim its position as the global hub for blockchain startups and token issuance, accelerating healthy industry growth.

Friends, the crypto market in 2025 is brimming with unprecedented opportunities. This is not only a triumph of technology but also a bridge to future wealth. If you've recognized these trends, seize the moment, adjust your investment strategy, and embrace this golden era with wisdom and action!

This morning, our AlphaStream 5.0 once again delivered a precise trading signal. Let's review this accurate trend-following short trade using the 5-minute chart:

- CBF/USDT 5-minute candlestick chart

**AIT COMMUNITY**

Through a detailed analysis of the 5-minute candlestick chart, we can clearly see that once the MACD indicator below formed a death cross, the market quickly experienced a significant downward trend. At the same time, the 5-day and 10-day moving averages above also formed a death cross and broke below the Bollinger Band's middle line, with the lower band opening up. This provided us with an excellent opportunity for a trend-following short trade. In just 30 minutes, this trend trade was precisely captured.

Once the opportunity emerged, the VIP3 Partner Group was the first to receive the trading signal and promptly executed their entry. As the trend became further confirmed, the VIP2 Partner Group followed closely, continuing to expand profits. When the trend accelerated, the VIP1 Partner Group decisively entered the market, capturing the accelerated returns at the tail end of the movement.

With this trade, our VIP Partner Groups once again achieved stable and gratifying results:

**This performance once again proves the undeniable certainty of opportunities in the crypto market! Friends, when market volatility is clear, and signals are precise, action is the key to our success. Is there any reason to hesitate? Let's continue to follow AlphaStream 5.0's guidance, seize every opportunity, and use results and returns to demonstrate just how right our choices are!**

**AIT COMMUNITY**

**As shown in the chart above, BTC's daily candlestick chart is currently in a high-level consolidation phase. While the possibility of setting new highs in the short term is expected to occur only after the end of January next year, the current consolidation appears more like a preparation phase for the bulls. However, for us as traders, volatility itself is synonymous with opportunity.**

**Today's trading strategy focuses primarily on shorting rebounds. The lower Bollinger Band provides support near \$94,000, and there is a high likelihood that the price will retest this level. It's important to note that while the Christmas holiday spirit lingers, today's data has a relatively limited impact on market movements, so the volatility may be smaller than expected.**

**Our Crypto Grammy 200-600% Profit Plan is progressing steadily. Friends, if you're not satisfied with your current returns, don't hesitate, contact me or my assistant immediately. We'll tailor a plan to enhance your performance and help you advance to a higher-tier VIP Partner Group, enabling you to better seize future trading opportunities.**

**I want to reiterate: our community will never abandon any partner who supports us! Every person pursuing their dreams deserves respect and should be given**
